

Task_2

In these Task we must perform several things which are given below.

1 Create user

2 Apply Is Alias

3 TOC Editor

4 Category

5 Permissions

6 Can Add

7 Show permission Warning

1) In these we create User by using **Users** in Admin and give permission to it. In these we have given Login name, Password and check the Logon Enabled check box.

The screenshot displays the Aras Innovator web application interface. The browser address bar shows 'localhost/InnovatorServer/Client/'. The application header includes the 'aras INNOVATOR' logo and a search bar. The left sidebar contains navigation options: 'Identities', 'Create New Identity', 'Search Identities', and 'Quick Search'. The main content area shows the 'User' identity form for the user '75D864112CA3461CBC7E94DD2819D1A0'. The form includes fields for Login Name (Yash), First Name, Last Name, Company Name, Password, Email, Telephone, Mail Stop, Confirm Password, Fax, Home Phone, Picture, Logon Enabled (checked), Starting Page, Employee #, Manager, Default Vault (Default), and Working Directory. Below the form, there is a section for 'Aliases' and 'Read Vaults'.

Login Name	First Name	Last Name	Company Name
Yash			

Password	Email	Telephone	Mail Stop

Confirm Password	Fax	Home Phone	Picture

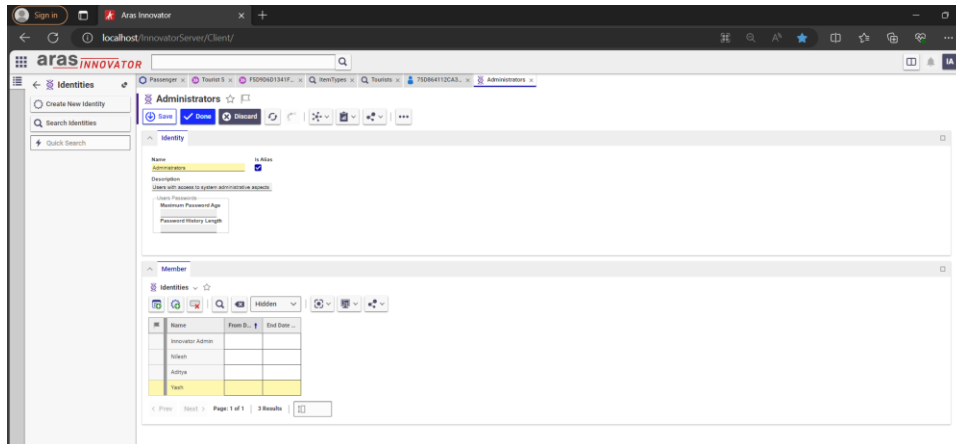

Logon Enabled	Cell	Pager
<input checked="" type="checkbox"/>		

Starting Page	Employee #	Manager

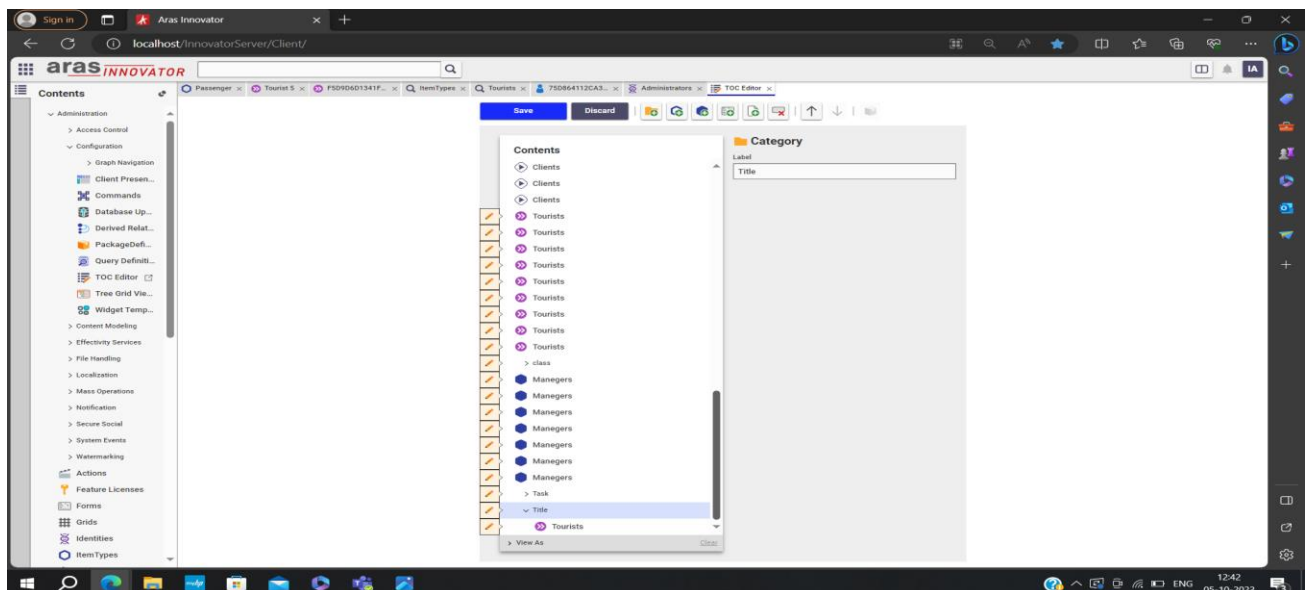

Default Vault	Working Directory
Default	

Aliases Read Vaults

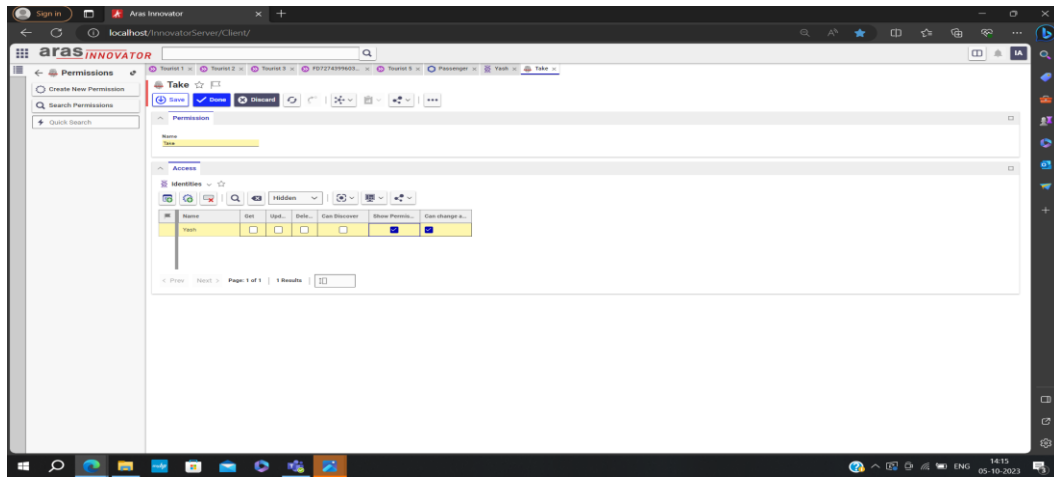

2) After creating user. Copy the link and paste in the private window. To get access go to admin and give in identities. Search User name give him access also click the Is Alias. By using Is alias we can create only one user.

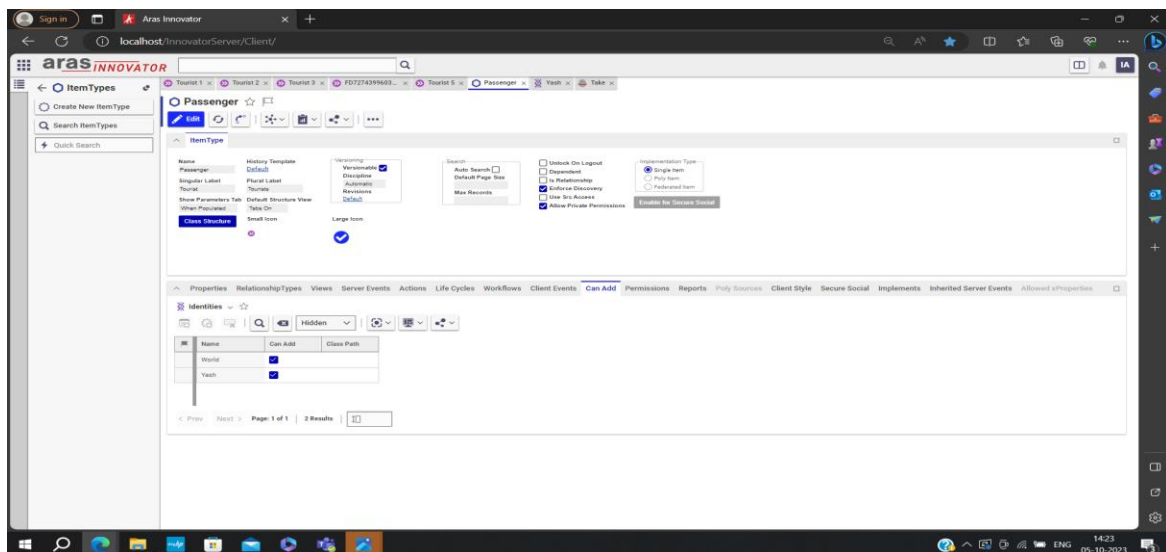

3) After the login our admin. It will show the all-item type in user side. After that go on TOC editor, we create new category. And we must drag and drop the our Item type in it.

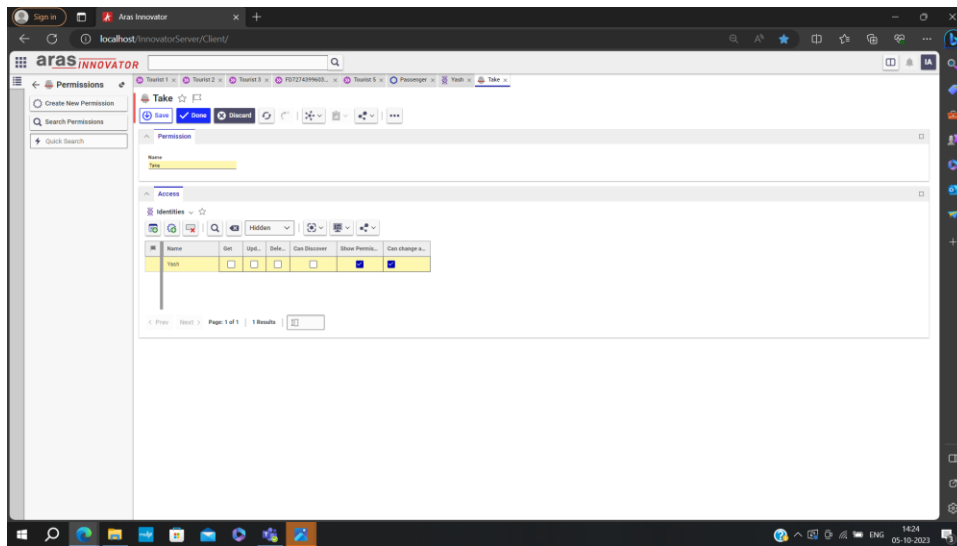

4) Then go on permissions give the name. then go below access Identities and search our username and check only show permission and access the changes.

5) Then go on Item type then below can add, Identities, the chose our username then chick because in can add will show who can I add.

6)after give the information to the form and save it will show these error.
