

Exploring Relationships & its Types

- Types of Relationships

- Direct Relationship
- Circular Relationship
- Null Relationship

Hide in All

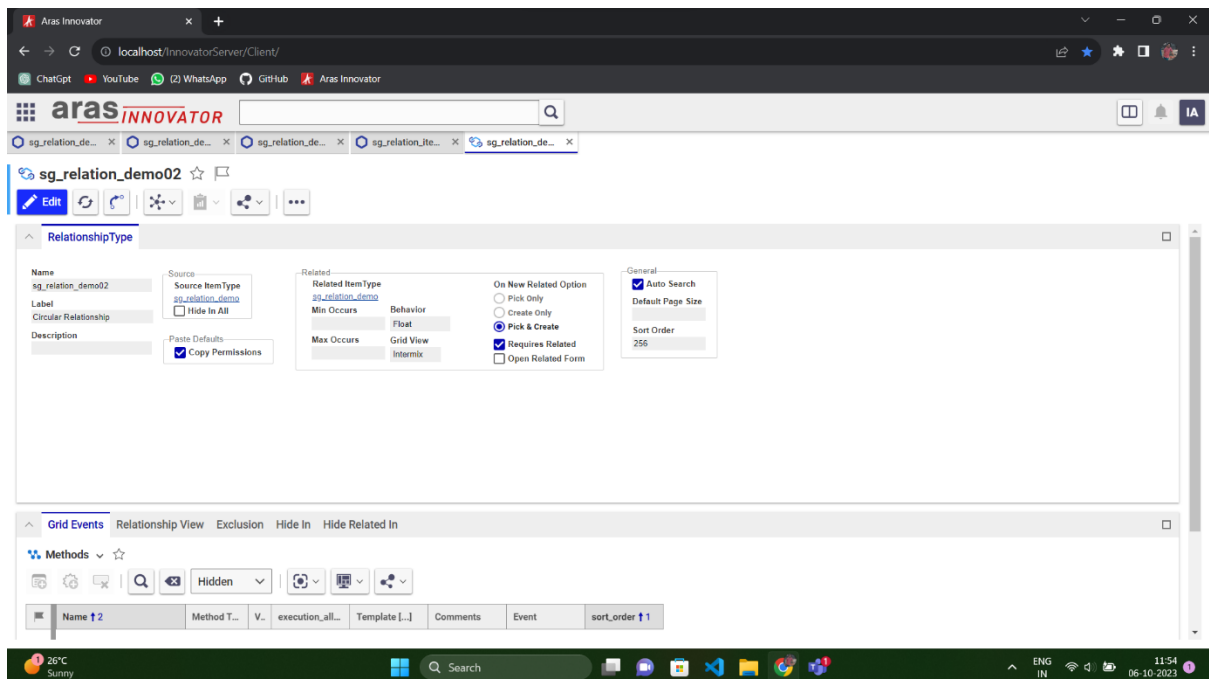

In hide in all option the relationship grid will hide with all option.

The first screenshot shows the 'RelationshipType' configuration for 'sg_relation_demo02'. The 'Source' section has 'Source ItemType' set to 'sg_relation_demo' and 'Hide in All' checked. The 'Related' section has 'Related ItemType' set to 'sg_relation_demo'. The 'On New Related Option' section has 'Pick Only', 'Create Only', 'Pick & Create', and 'Requires Related' checked. The 'General' section has 'Auto Search' checked and 'Default Page Size' set to 256. A green notification bar at the top right says 'Item 'sg_relation_demo02' saved successfully.'

The second screenshot shows the 'Grid Events' configuration for 'sg_relation_demo'. The 'Methods' section has 'Hidden' selected. The 'Direct Relationship' section shows a table with columns 'sg relation ch...' and 'related_id'.

Copy permission:

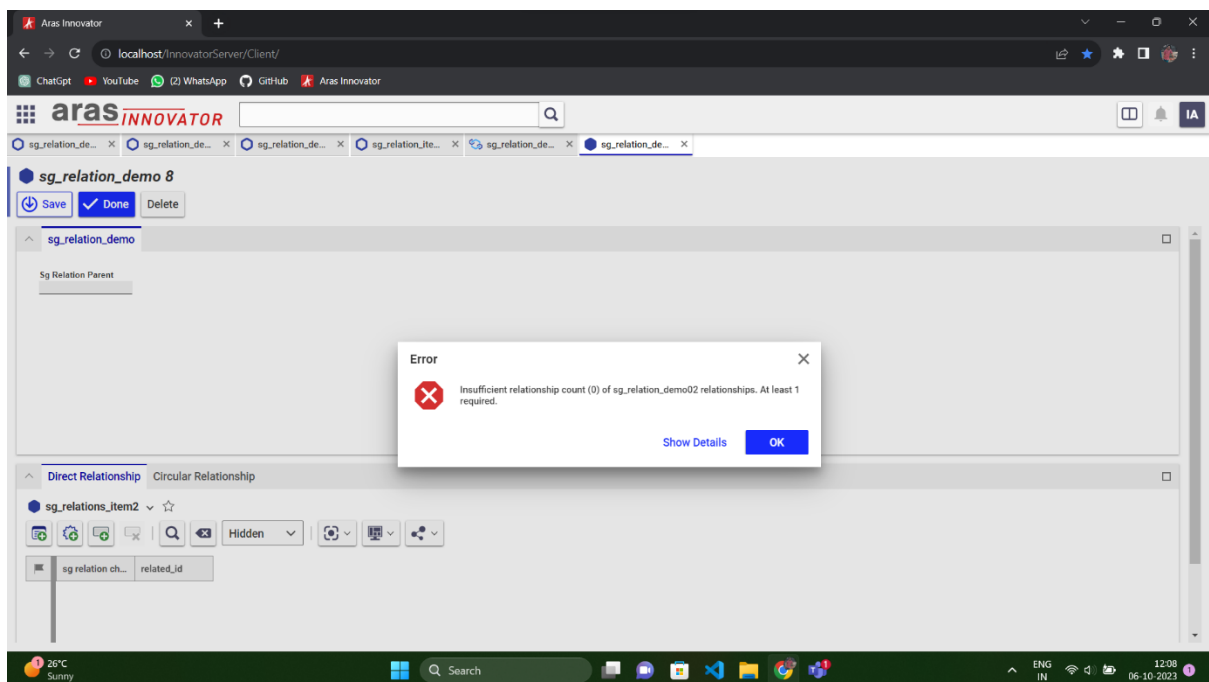

In Copy permission the child (or related) item will get all the permission by default, we don't have to give separate permission to the child class.

Min Occurs & Max Occurs:

In this option enforce the user to fill the data, by setting the minimum value and maximum value.

User cant exceed the minimum or maximum value, values should resemble.

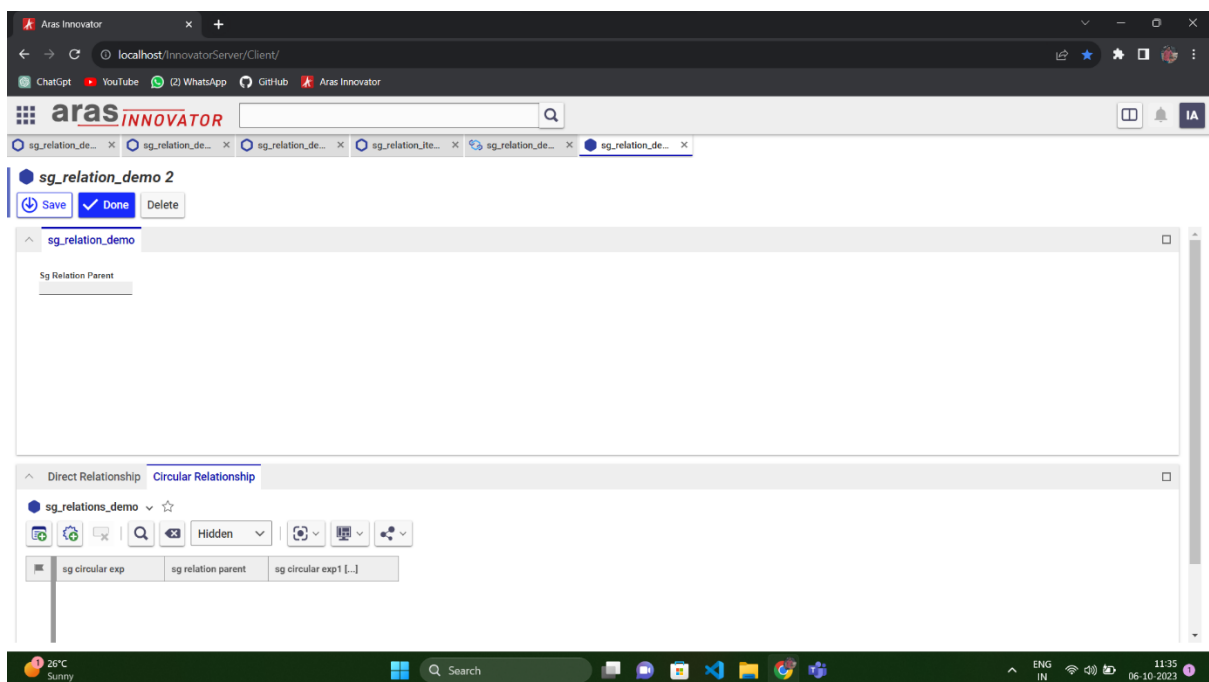

Grid view:

In this option we can arrange the property order created item by giving all the property order value set in relationship tab.

There are the types of Grid View:

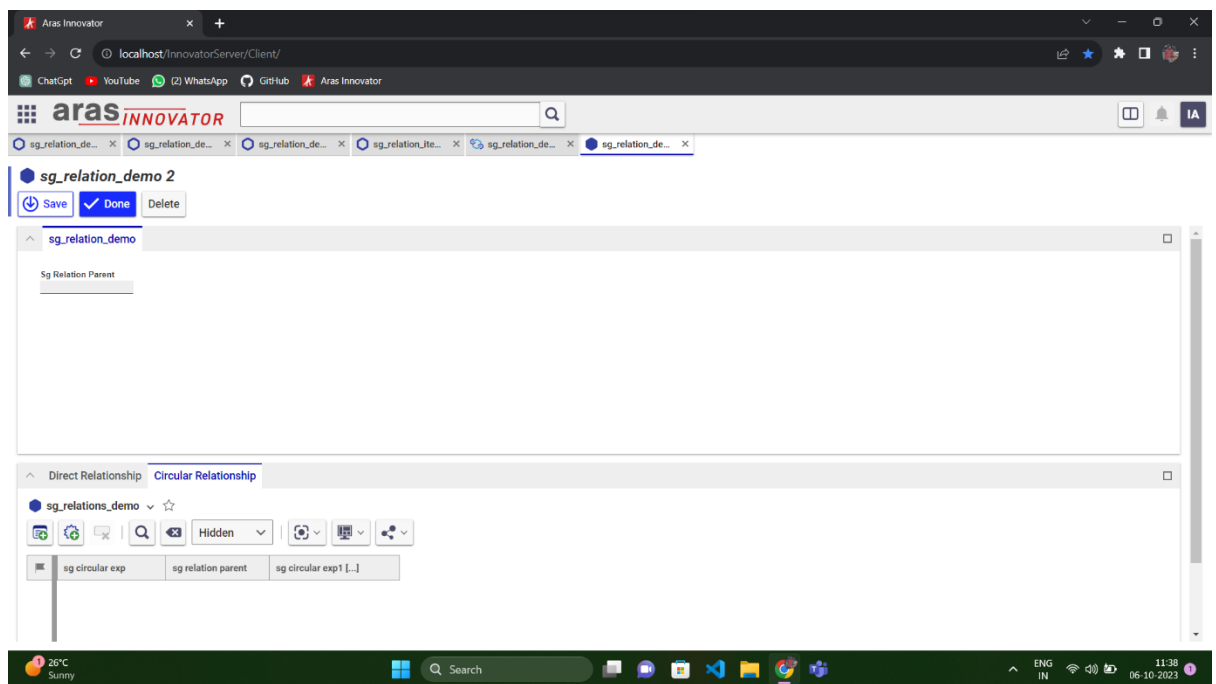

- Left
- Right
- Intermix

New Related Option:

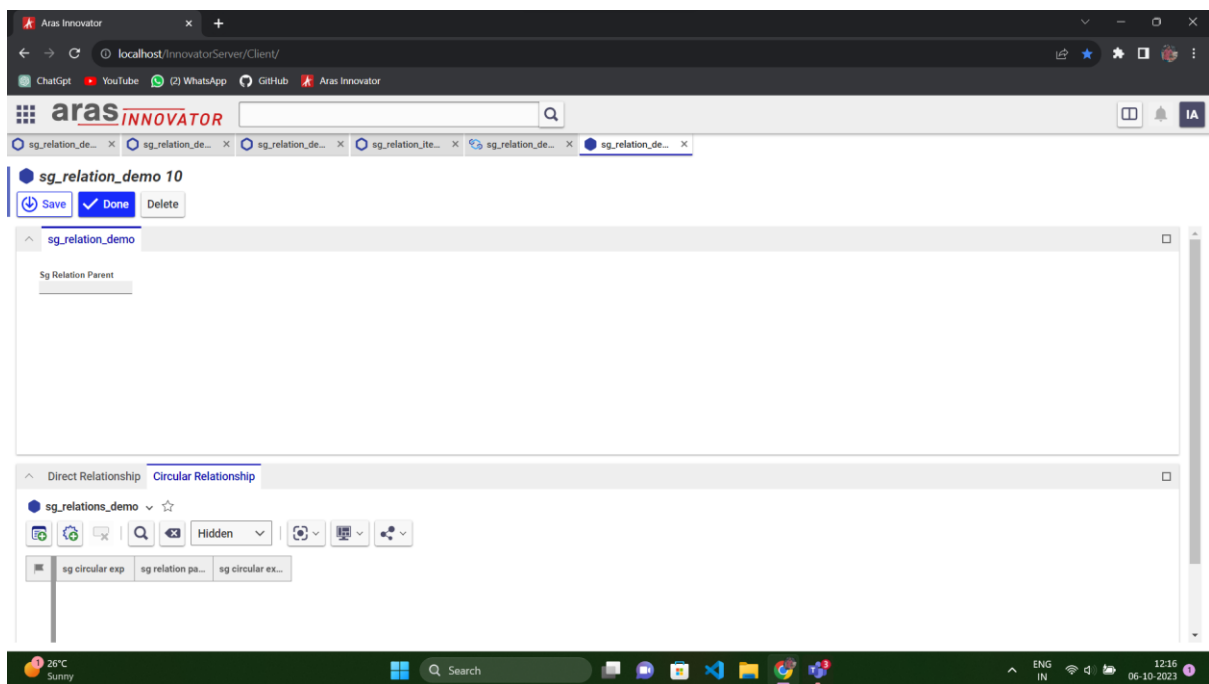

Mainly there are three radio button in this option to enable and disable the option in relationship tab.

- Pick Only
- Create Only
- Pick & Create

Requires Related Option:

This button enforces the above selected radio button option. If we tick this option and select any of the above button this will only show the above selected option.

Open Related Form Option:

In this option if user enter any value it will automatically create a new form to fill the value in the relationship tab.
