

1.Create new user and give access for item type.

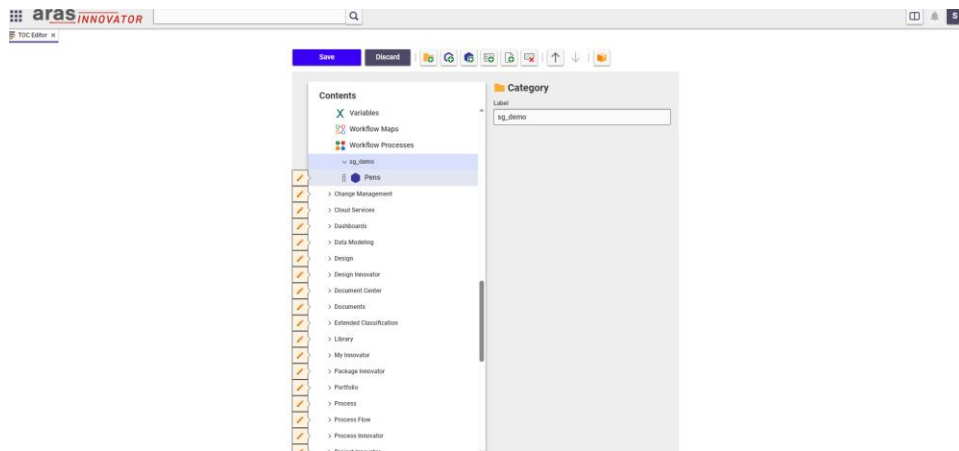

2.Is Alias-if we don't want to give access to child user of our user for that we have to check it.

3.TOC access- To show all the item type of existing user in new user we have to give the toc access.

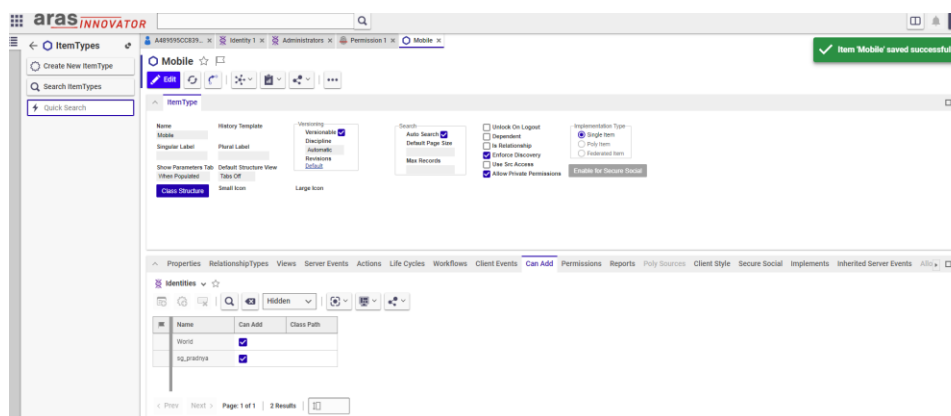

4.Create category- To show all item type under one category.

Steps:

- 1.Navigate to TOC
- 2.Administartion
- 3.configuration
- 4.Toc editor
- 5.Add category
- 6.Give name to that category
- 7.Save
- 8.Drag and drop item type in new category
- 9.save

6.CanAdd- give permission to the user to create item type.

5.Permission- give permission to the new user to modify item type.

Steps:

- [illegible]
