

1. Create User - To give access to our client.
- Procedure to create User

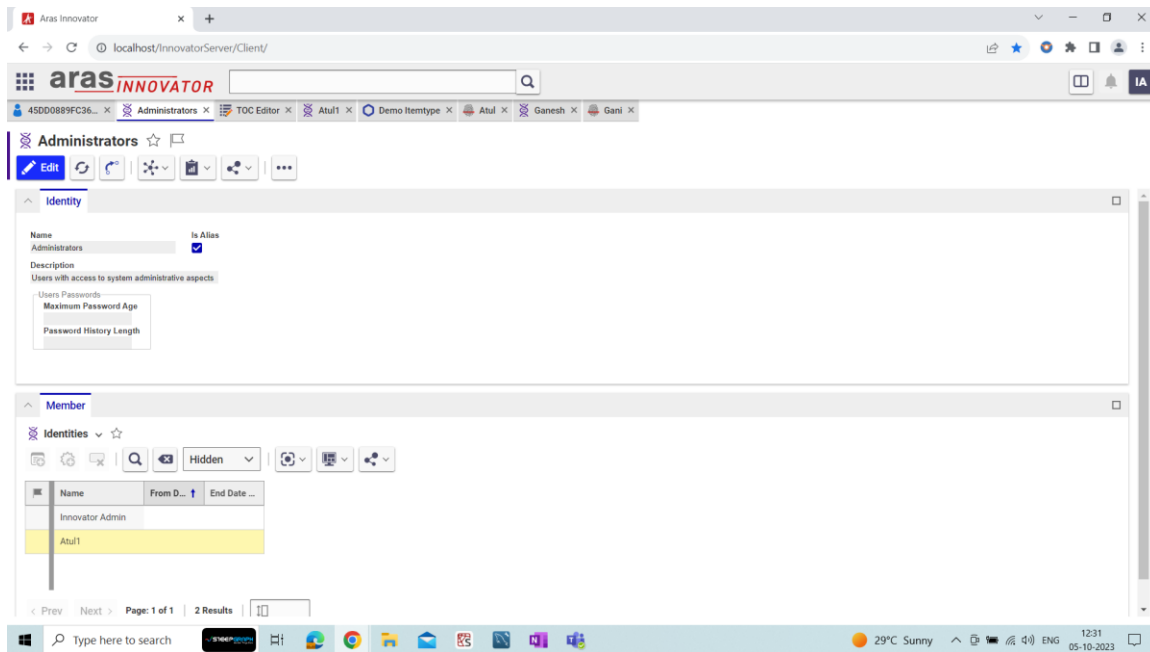

Go to TOC -> Administrator -> User -> Create User (To create User Name, Password is compulsory and tick on Logon Enabled)

The screenshot shows the 'Create User' form in the Aras Innovator application. The browser address bar shows 'localhost/InnovatorServer/Client/'. The user ID '45DD0889FC36...' is visible. The form includes fields for Login Name (Abu1), Password, Confirm Password, Logon Enabled (checked), Starting Page, Default Vault (Default), First Name, Last Name, Company Name, Email, Telephone, Mail Stop, Fax, Home Phone, Picture, Cell, Pager, Employee #, Manager, and Working Directory. There are also buttons for 'Edit', 'Cancel', and 'Save'.

2. Is Alias – If we enabled Alias, it represents that no child user will exist or nor created.

To tick on Is Alias user -> Alias -> Identities -> Is Alias

3. TOC Access – We give the user TOC access from the admin so that he can access Item Types.

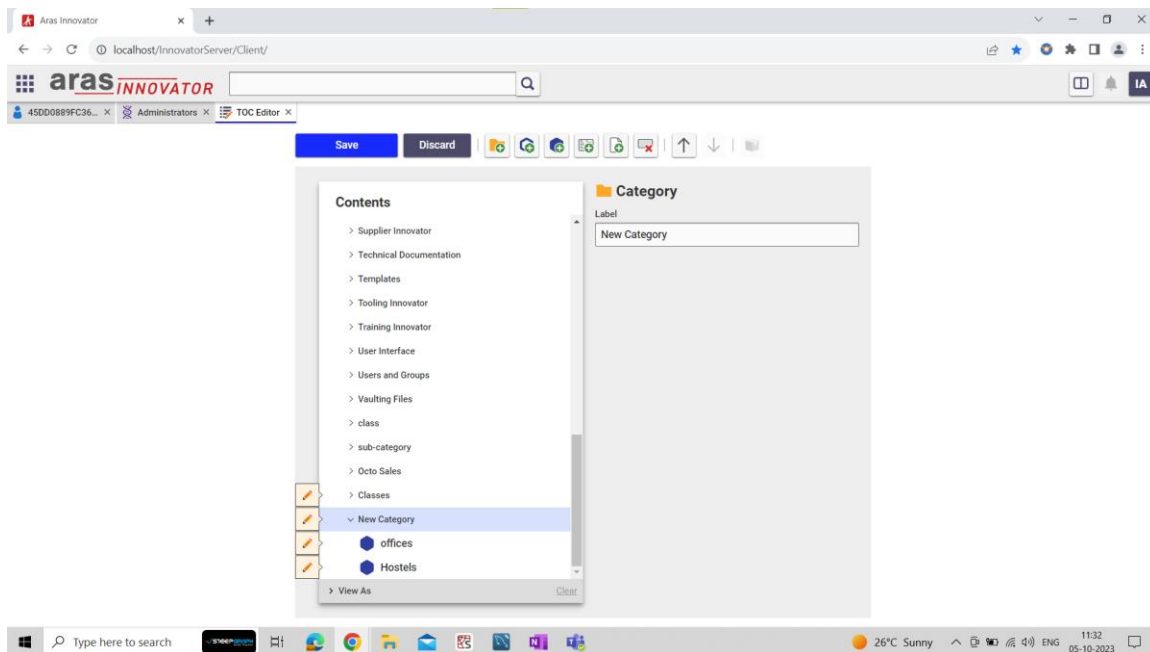

To give TOC access to user go to Administrator -> Identities -> Search Administrator

- Edit – Identities – add user - permissions

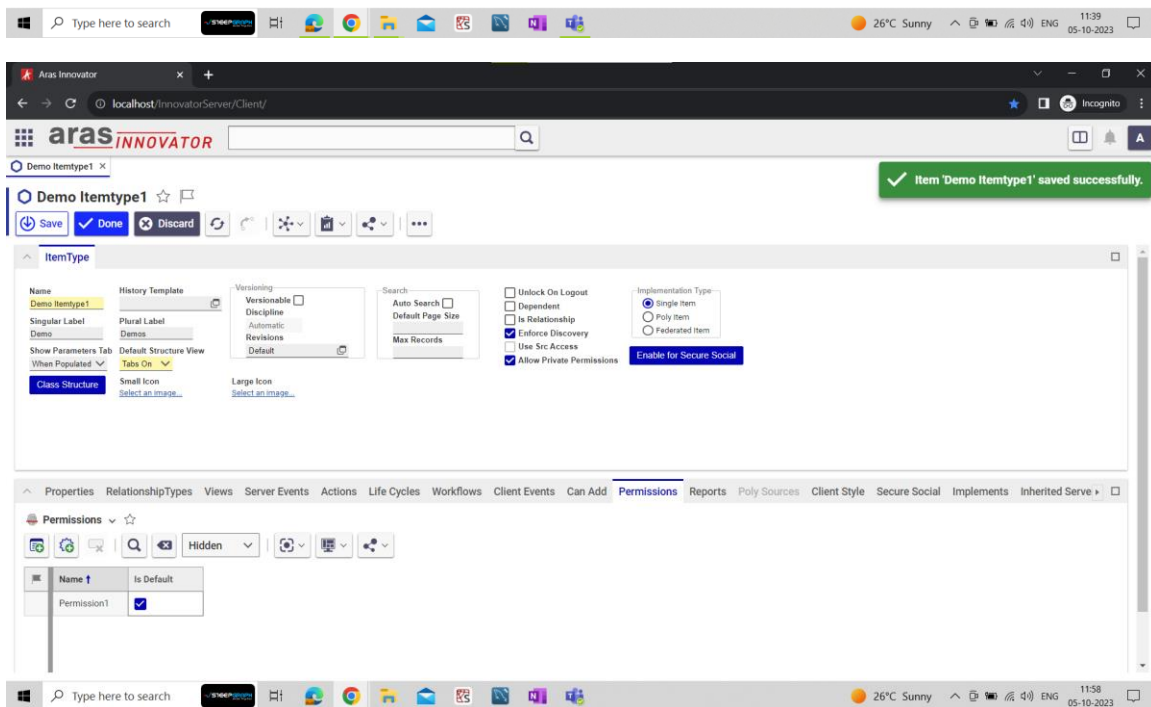

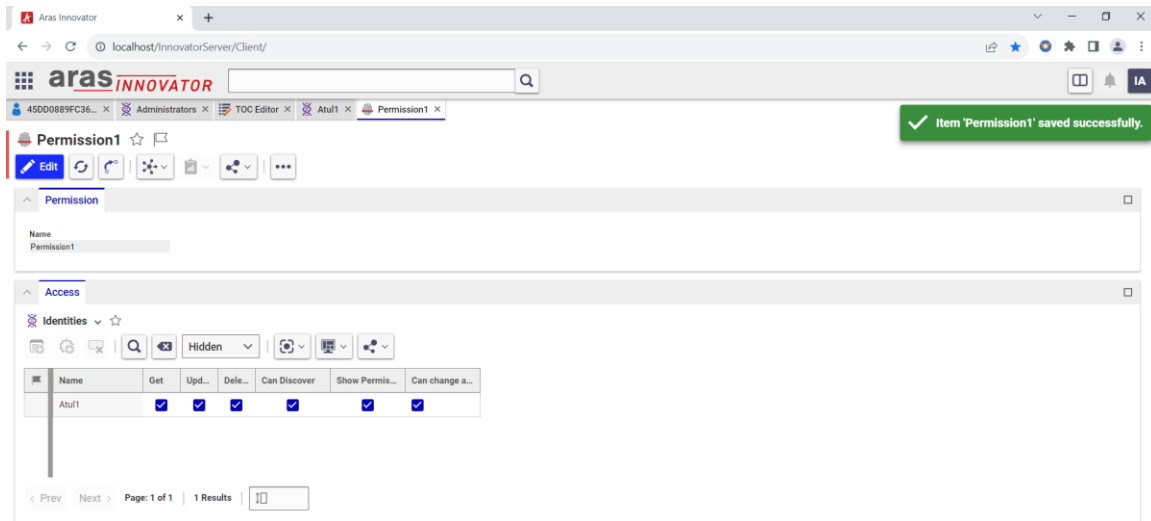

4. Category Created – We create a category so that we can have all our item types in one category.

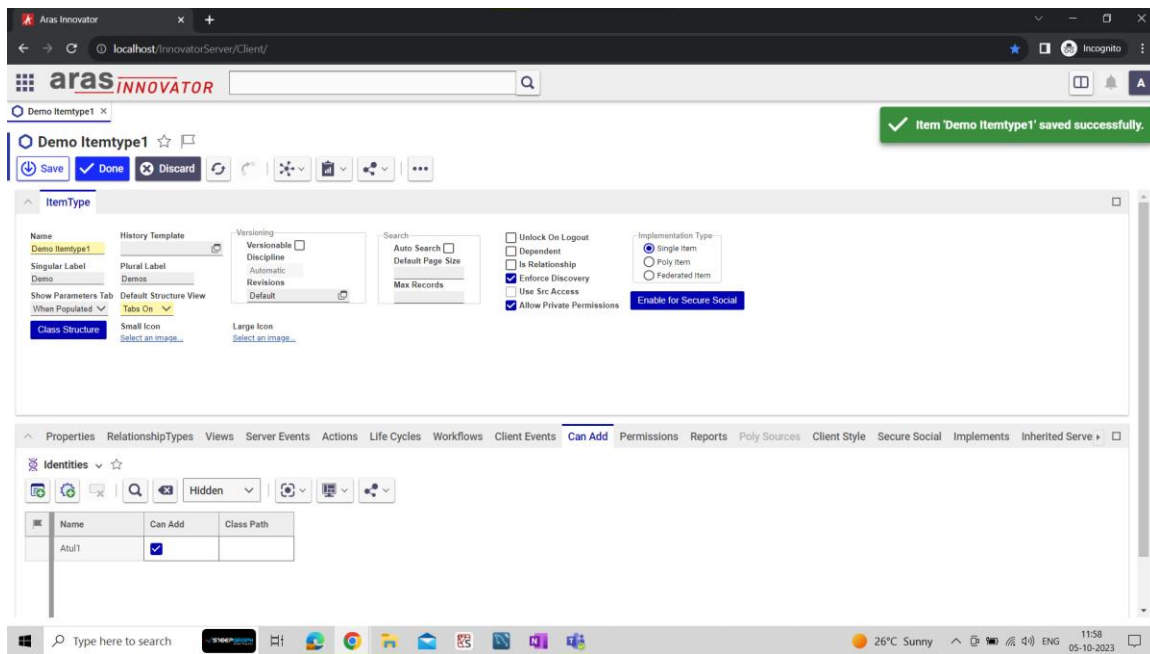

To add category Administrator -> TOC editor -> Create category -> Drag and drop

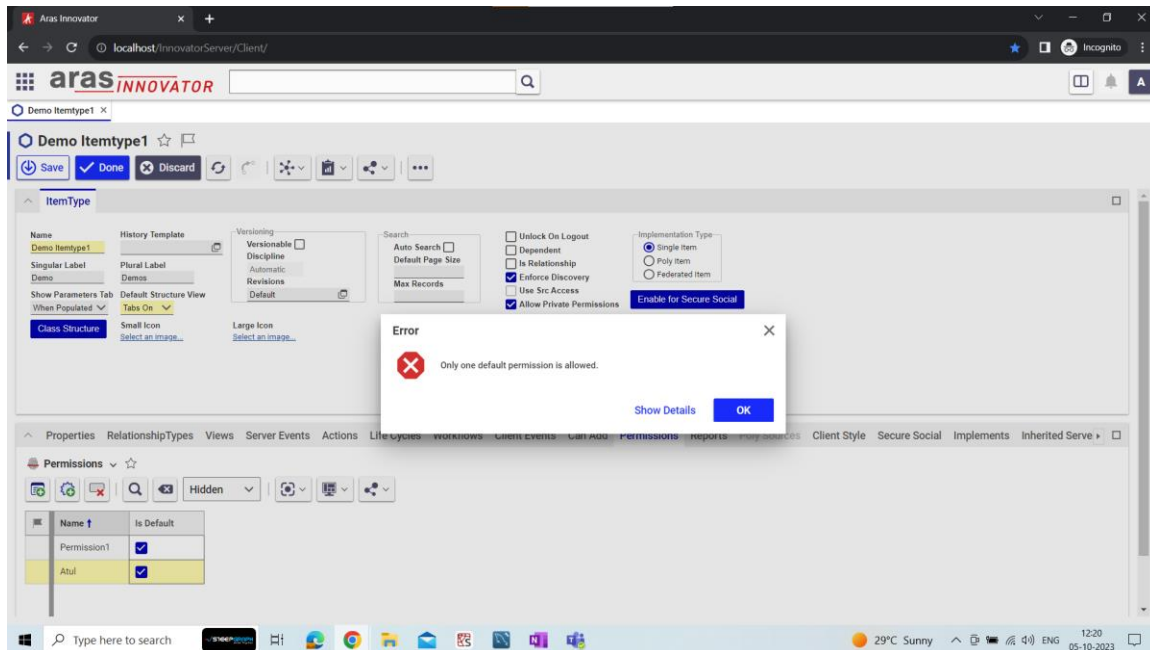

5. Permissions – We give permissions to the user so that he can customize item types as requirement.

6. Can Add – It allows the user to create new items or edit them.

7. Show Permission Warning – You can give default permission (all permissions) to only one user more than that are not allowed.

- If we don't give all permissions, then we get this error
