

## Task 4

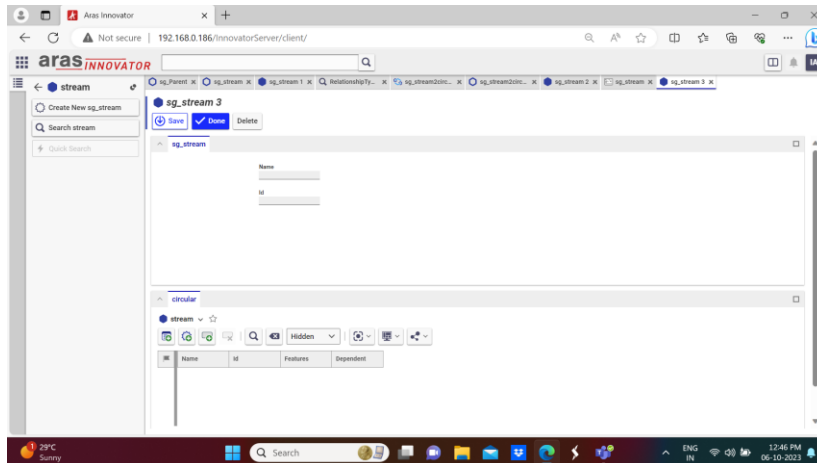

In this task we have perform Relationship types

There are 3 different types of relationship types

- 1) Circular
- 2) No – related
- 3) Null

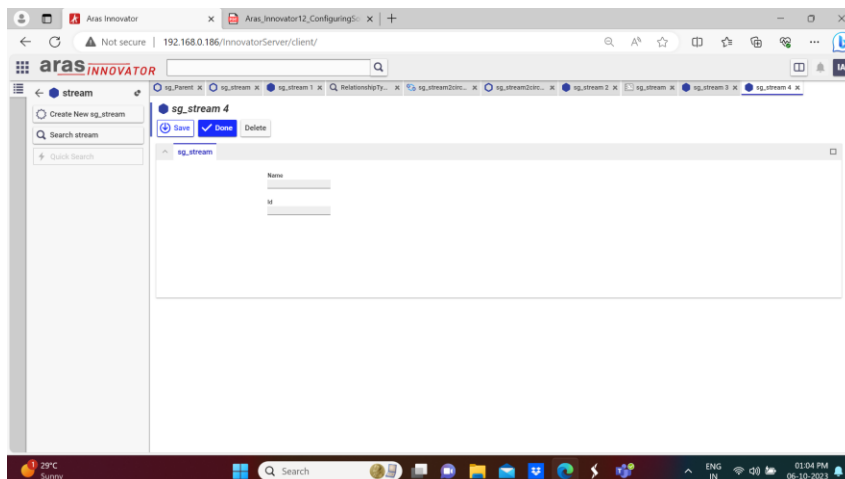

First we create one item type then add some properties add toc and permission.

- 1) Circular:

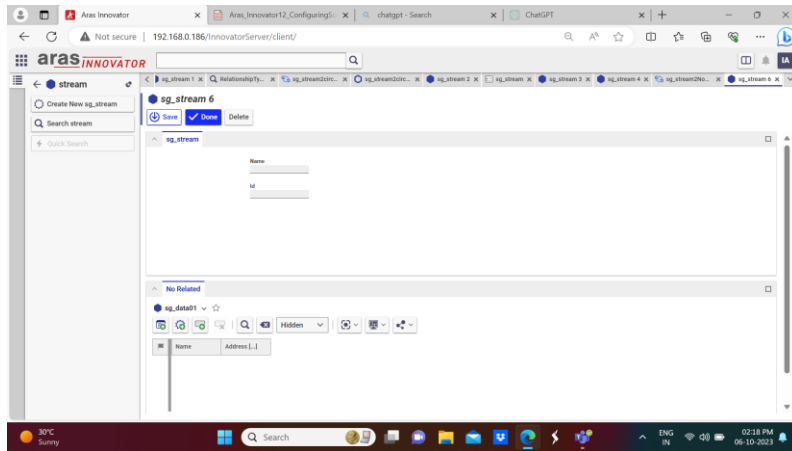

One item type has multiple items of a parent.

- Hide In All:

If check hide in all then hides the relationship on the relationship grid of the parent item.

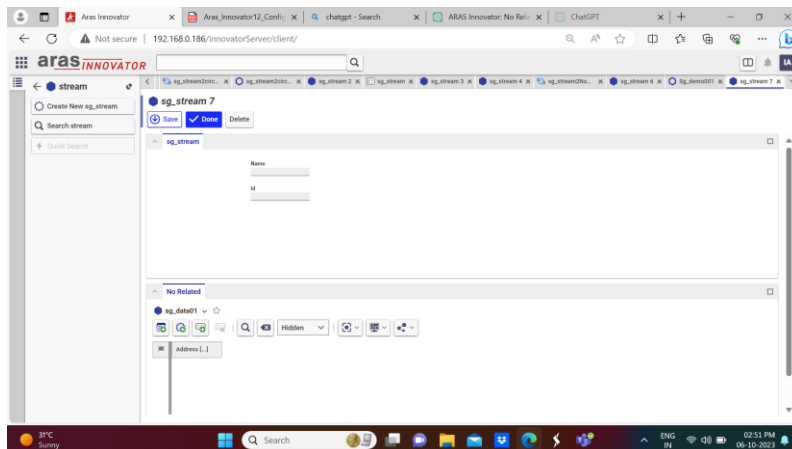

## 2)No- Related:

In No-related there two item types parent and child In parent item

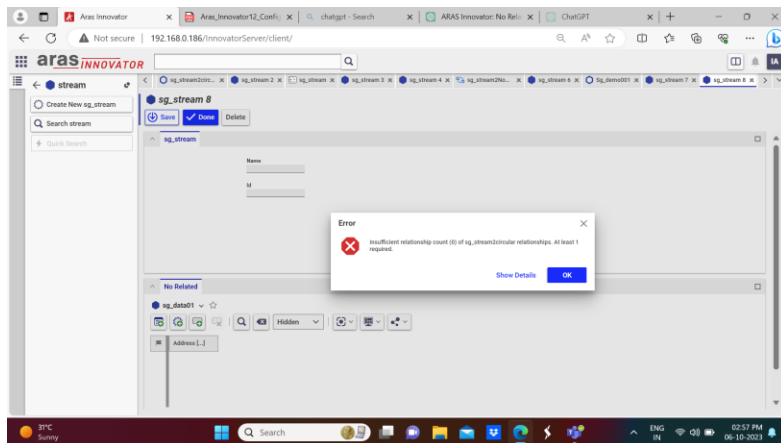

Type show properties of child item type but child item type not show properties of parent item types.

- Hidden 2:

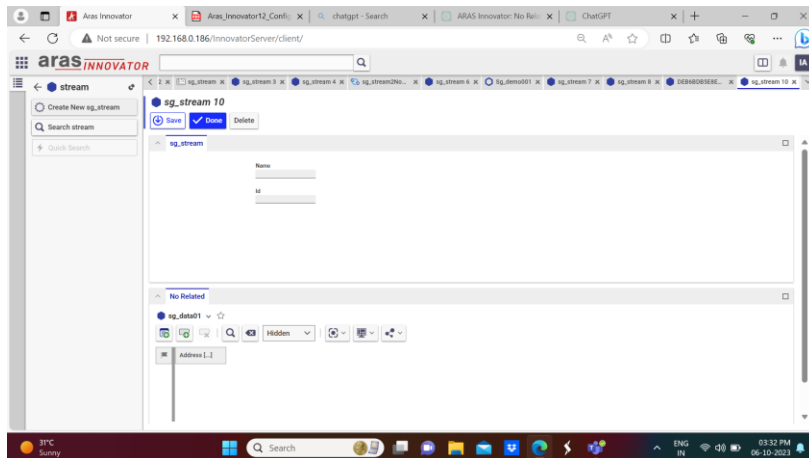

They hide the grid of relationship .

- Min Occur:

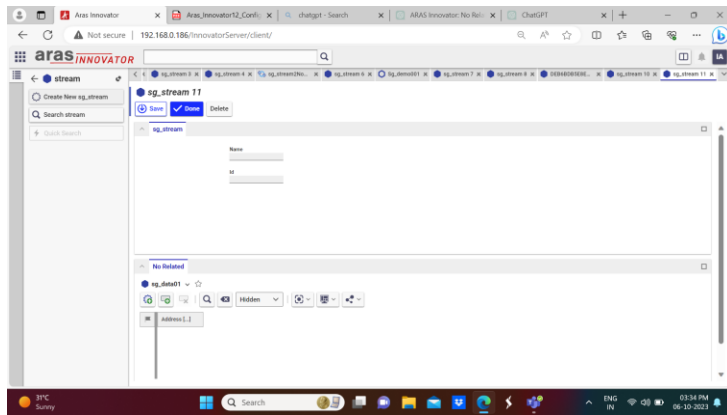

In Min Occurs minimum number of relationships required.

- Pic Only:

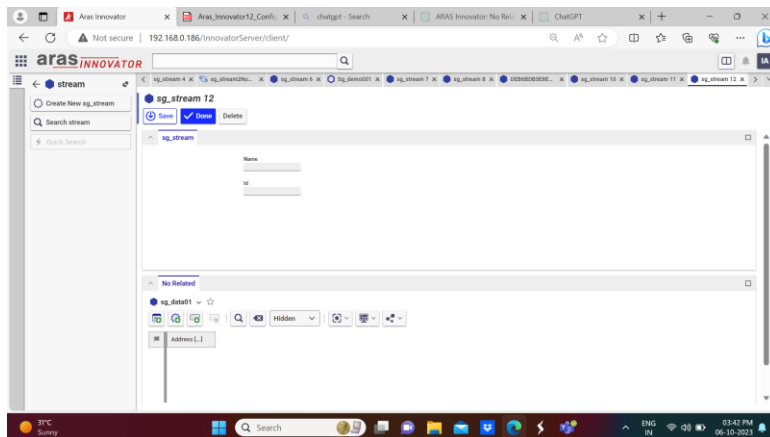

Pic Only button is show.

- Create Only:

Showing Create Only button.

- Pic And Create:

Showing both Pic Only and create Buttons.
