## Task 3

Thursday, October 05, 2023 7:33 PM

First we create two new item types (eg. sg\_parent and sg\_child). Then add properties for this item types.

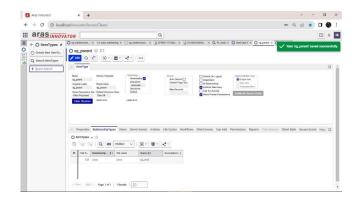

Add Toc, can Add, and get permission.

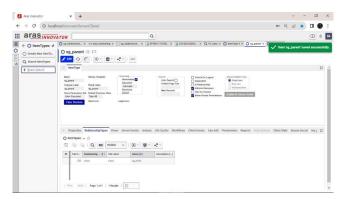

Then go to parent item types and then relationship type

Add new item types then search child item type name

And select child item type add label.

Then go to Toc and then relationship type.
